

## CONTENTS

Preface . . . . .	v
1. FUNDAMENTAL ASPECTS	
Transport processes in solids during ion implantation . . . . . P. Mazzoldi (Padova, Italy) and A. Miotello (Povo, Italy)	1
Bombardment-induced compositional change with alloys, oxides, oxysalts and halides	
III. The role of chemical driving forces . . . . . R. Kelly (Yorktown Heights, NY, U.S.A.)	11
Temperature and dose dependence of nitrogen implantation into iron: experimental results and numerical modelling. . . . . G. Terwagne, M. Piette, F. Bodart (Namur, Belgium) and W. Möller (Garching, F.R.G.)	25
The effects of $\alpha$ -particle irradiation on carbonitrides produced in a nitrogen-implanted low-carbon steel . . S. M. M. Ramos, L. Amaral, M. Behar, G. Marest, A. Vasquez and F. C. Zawislak (Porto Alegre, Brazil)	31
Titanium implantation into a high speed steel: distribution parameters and CEMS characterization . . . . . M. A. El Khakani, H. Jaffrezic, G. Marest, N. Moncoffre and J. Tousset (Villeurbanne, France)	37
Diffusion of implanted sodium in nickel and chromium. . . . . A. Kehrel, K. P. Lieb and M. Uhrmacher (Göttingen, F.R.G.)	43
Temperature and fluence effects in lead-implanted cobalt single crystals . . . . . A. Johansen, L. Sarholt-Kristensen, E. Johnson, S. Steenstrup and V. S. Chernysh (Copenhagen, Denmark)	49
Surface deformations caused by high-dose high-energy helium, neon and argon ions . . . . . F. Pászti (Budapest, Hungary)	57
Megaelectronvolt ion beam polishing of anodically grown alumina . . . . . B. Daudin and P. Martin (Grenoble, France)	63
2. ION-INDUCED PHASES	
Compound formation effects in computing implantation profiles . . . . . A. J. Armini and S. N. Bunker (Danvers, MA, U.S.A.)	67
Glancing-angle X-ray diffraction and X-ray photoelectron spectroscopy studies of nitrogen-implanted tantalum . . . . . P. M. Raole, A. M. Narsale, D. C. Kothari, P. S. Pawar, S. V. Gogawale (Bombay, India), L. Guzman and M. Dapor (Trento, Italy)	73
Target temperature dependence on titanium oxide formation by high-dose oxygen ion implantation into titanium sheets. . . . . Y. Okabe, M. Iwaki and K. Takahashi (Wako, Japan)	79
Transmission electron microscopy investigation of the structural transformations in titanium or TiAl implanted with nitrogen, carbon, oxygen and boron . . . . . J. C. Pivin, P. Zheng and M. O. Ruault (Orsay, France)	83
Surface precipitation of natural and ion-implanted lithium and boron in metals . . . . . D. Fink (Berlin, F.R.G.)	89
X-ray studies of krypton, xenon and lead inclusions in aluminium single crystals . . . . . L. Gråbæk, J. Bohr (Roskilde, Denmark), E. Johnson, H. H. Andersen, A. Johansen and L. Sarholt-Kristensen (Copenhagen, Denmark)	97
Pressure effects of krypton bubbles on the host aluminium lattice as probed by $^{57}\text{Co}$ impurity atoms . . . . H. Pattyn, P. Hendrickx, J. Odeurs and S. Bukshpan (Leuven, Belgium)	103
3. AMORPHIZATION	
Ion-induced crystal-to-glass transition in alloys . . . . . P. M. Ossi (Milan, Italy)	107

On metallic glass formation in Cu-Nb by ion beam mixing . . . . .	123
L.-U. Aaen Andersen, J. Bøttiger and K. Dyrbye (Aarhus, Denmark)	
Detailed analysis of the amorphization process in low-temperature ion-bombarded metallic alloys . . . . .	127
L. Thomé, A. Benyagoub (Orsay, France), F. Pons (Caen, France), E. Ligeon, J. Fontenille and R. Danielou (Grenoble, France)	
Temperature dependence of amorphization and precipitation processes in Ni <sup>+</sup> - and N <sup>+</sup> -implanted Ni <sub>x</sub> Ti <sub>1-x</sub> alloys . . . . .	133
J. Delage, O. Popoola, J. P. Villain and P. Moine (Poitiers, France)	
Amorphization process in manganese-implanted aluminium thin films and single crystals: effects of strains and target temperature . . . . .	139
A. Seidel, S. Massing, B. Strehlau and G. Linker (Karlsruhe, F.R.G.)	
Transmission electron microscopy study of amorphization and precipitation in Ni <sup>+</sup> -implanted aluminium . . . . .	145
M. F. Denanot, O. Popoola and P. Moine (Poitiers, France)	
 4. ION BEAM MIXING	
Ion beam mixing of selected binary metal systems with large positive heats of formation . . . . .	151
W. Hiller, M. Euchgeister, P. Eitner, K. Kopitzki, V. Lilienthal and E. Peiner (Bonn, F.R.G.)	
Different crystalline structures of ruthenium-rich metastable phases formed by ion beam mixing of the binary systems Au-Ru and Ag-Ru . . . . .	155
M. Buchgeister, W. Hiller, K. Kopitzki, G. Mertler, E. Peiner (Bonn, F.R.G.) and W. Jäger (Jülich, F.R.G.)	
Ion beam effects on Fe-Ni bilayers. . . . .	161
L. M. Gratton (Povo, Italy), A. Gupta (Padova, Italy), W. Keune (Duisburg, F.R.G.), S. Lo Russo (Padova, Italy), J. Parellada (Barcelona, Spain), G. Principi (Padova, Italy) and C. Tosello (Povo, Italy)	
Mixing and annealing effects in the krypton-irradiated Fe-Pd system. . . . .	165
G. Battaglin (Venezia, Italy), R. Bertoncello, G. Granozzi (Padova, Italy), G. Fagherazzi (Venezia, Italy), S. Lo Russo (Padova, Italy) and P. Mengucci (Ancona, Italy)	
Low-temperature mixing of metallic multilayers with light ions . . . . .	171
A. Traverse, L. Névot, B. Pardo and J. Corno (Orsay, France)	
High-power ion-beam-induced melting and mixing in deposited structures . . . . .	175
A. D. Pogrebnjak, G. E. Remnev (Tomsk, U.S.S.R.) and S. V. Plotnikov (Ust'Kamenogorsk, U.S.S.R.)	
 5. ION-BEAM-ASSISTED DEPOSITION	
Fundamentals of ion-beam-assisted deposition: technique and film properties . . . . .	181
G. K. Hubler (Washington, DC, U.S.A.)	
Simultaneous ion implantation and deposition . . . . .	193
J. P. Budinavičius, L. J. Pranevičius, S. J. Tamulevičius and J. J. Vosylius (Kaunas, U.S.S.R.)	
Surface modification of structural materials by dynamic ion mixing process. . . . .	197
S. Nakashima, M. Fukushima, M. Haginoya, K. Oohata, I. Hashimoto and K. Terakado (Hitachi, Japan)	
Nitride formation at metal surfaces by Ar <sup>+</sup> ion bombardment in nitrogen atmosphere . . . . .	203
Y. Baba and T. A. Sasaki (Tokai-mura, Japan)	
Structure and properties of titanium carbide grown by dynamic ion beam mixing . . . . .	209
S. Pimbert-Michaux, C. Chabrol (Firminy, France), M. F. Denanot and J. Delafond (Poitiers, France)	
Physical properties of TiN thin films . . . . .	217
F. Marchetti, M. Dapor, S. Girardi, F. Giacomozzi and A. Cavalleri (Povo, Italy)	
Ion-induced radiation-enhanced diffusion of silver in nickel . . . . .	223
D. Marton, J. Fine and G. P. Chambers (Gaithersburg, MD, U.S.A.)	

## 6. MECHANICAL PROPERTIES

Phase transformations of a nitrogen-implanted austenitic stainless steel (X10 CrNiTi 18-9) . . . . .	229
R. Leutenecker (München, F.R.G.), G. Wagner, T. Louis, U. Gonser (Saarbrücken, F.R.G.), L. Guzman and A. Molinari (Povo, Italy)	
Wear resistance improvement and structural modifications of B <sup>+</sup> -implanted austenitic stainless steel . . .	245
S. Raud, H. Garema, A. Naudon, J. P. Villain and P. Moine (Poitiers, France)	
Annealing behaviour of nitrogen-ion-implanted 304 stainless steel . . . . .	253
S. Shrivastava, R. D. Tarey, A. Jain and K. L. Chopra (New Delhi, India)	
Post-implantation heat treatment of nitrogen-implanted 440C stainless steel. . . . .	257
P. Huang and R. F. Hochman (Atlanta, GA, U.S.A.)	
Examination of wear, hardness and friction of nitrogen-, boron-, carbon-, silver-, lead- and tin-implanted steels with different chromium contents . . . . .	261
A. Kluge, K. Langguth, R. Öchsner, K. Kobs and H. Ryssel (Erlangen, F.R.G.)	
Surface mechanical properties of CuNi and FeAl films produced by dynamic ion mixing . . . . .	267
J. von Stebut (Nancy, France), J. P. Rivière, J. Delafond, C. Sarrazin (Poitiers, France) and S. Michaux (Firminy, France)	
The influence of temperature on the performance of ion-implanted metal-forming tools . . . . .	273
P. Ballhause, G. K. Wolf (Heidelberg, F.R.G.) and Chr. Weist (Stuttgart, F.R.G.)	
Composition and sliding contact behavior of oxidized titanium-implanted 52100 steel . . . . .	279
I. L. Singer (Washington, DC, U.S.A.) and R. A. Jeffries (Ft. Washington, MD, U.S.A.)	
Friction behavior and debris formation of titanium-implanted 52100 steel . . . . .	285
S. Fayeulle (Ft. Washington, MD, U.S.A.) and I. L. Singer (Washington, DC, U.S.A.)	
Microstructure and mechanical properties of high dose nitrogen-implanted iron, chromium and titanium sheets . . . . .	291
T. Fujihana (Yokohama, Japan), Y. Okabe (Ohsato, Japan) and M. Iwaki (Wako, Japan)	
Microstructure and hardness of titanium and iron surfaces after megaelectronvolt nitrogen implantation. .	297
A. M. Vredenberg, F. Z. Cui, F. W. Saris (Amsterdam, The Netherlands), N. M. van der Pers and P. F. Colijn (Delft, The Netherlands)	
Friction and wear studies of oxidized titanium surfaces bombarded with ions in the 100 keV region . . . .	303
B. M. Lund, N. J. Mikkelsen, L. M. Schmidt and G. Sørensen (Aarhus, Denmark)	
Effect of ion implantation on fatigue, fretting and fretting-corrosion of Ti-6Al-4V. . . . .	307
S. Saritas (Gaziantep, Turkey), R. P. M. Procter (Manchester, U.K.) and W. A. Grant (Salford, U.K.)	
The effect of ion beam surface modifications on fatigue crack initiation in polycrystalline nickel. . . . .	315
D. J. Morrison, J. W. Jones, D. E. Alexander, C. Kovach and G. S. Was (Ann Arbor, MI, U.S.A.)	
Structural characterization and fatigue behaviour of a carbon-implanted pure polycrystalline nickel. . . .	323
S. Patu, M. H. Xu and Z. G. Wang (Shenyang, China)	
Ion implantation and fatigue crack initiation: interaction of persistent slip bands with modified surface layers . . . . .	331
D. S. Grummon (East Lansing, MI, U.S.A.), D. J. Morrison, J. W. Jones and G. S. Was (Ann Arbor, MI, U.S.A.)	
Dislocation structures in near-surface layers of pure metals formed by ion implantation . . . . .	337
A. N. Didenko, A. I. Rjabchikov, G. P. Isaev, N. M. Arzubov, Yu. P. Sharkeev, E. V. Kozlov, G. V. Pushkareva, I. V. Nikonova (Tomsk, U.S.S.R.) and A. E. Ligachev (Moscow, U.S.S.R.)	
Ion beam modification of MoS <sub>x</sub> films on metals . . . . .	343
N. J. Mikkelsen and G. Sørensen (Aarhus, Denmark)	
Fundamental study of TiN films deposited by ion beam mixing . . . . .	349
K. Hayashi, K. Sugiyama (Sagamihara, Japan), K. Fukutani and H. Kittaka (Kimitsu, Japan)	

Nitrogen ion implantation into the intermetallic compound TiAl . . . . .	355
K. Saito and T. Matsushima (Tsukuba, Japan)	
Ion implantation in ceramics—residual stress and properties . . . . .	361
C. J. McHargue, M. E. O'Hern, C. W. White and M. B. Lewis (Oak Ridge, TN, U.S.A.)	
Ion implantation in Japan in non-semiconductor fields . . . . .	369
M. Iwaki (Wako, Japan)	
Present status of ion implantation in non-semiconductor materials in China . . . . .	377
G. L. Zhang (Beijing, China)	
AUTHOR INDEX . . . . .	385
SUBJECT INDEX . . . . .	387
